#### User\_Details

- + ID: int
- + User Name: varchar
- + Password: char + Role: varchar
- + Phone Number: char
- + Email: char
- + Address: varchar
- + Photo: char
- + Status: bool
- + updatePassword(int, char): bool
- + updatePhoneNumber(int, char): bool
- + updateEmail(int, char): bool
- + updateAddress(int, char): bool
- + updatePhoto(int, char): bool
- + updateStatus(int, bool): bool

#### Medicine

- + ID: int
- + Name: varchar
- + Strength: varchar
- + Group Name: varchar
- + Brand Name: varchar
- + Price: float
- + updatePrice(int): bool

### **Appointment**

- + ID: int
- + P ID: int
- + D ID: int
- + H ID: int
- + Date: date
- + updateDate(int, date): bool

# **Speciality**

- + D ID: int
- + Field: varchar
- + updateField(int, char): bool

# **Awards Honors**

- + D ID: int
- + Award\_Name: varchar
- + Awarding Organization:: varchar
- + Year Received: year
- + Description: varchar
- + updateName(int, char): bool
- + updateOrganization(int, char): bool
- + updateYear(int, int): bool
- + updateDescription(int, char): bool

#### Patient

- + ID: int
- + Fname: varchar
- + Lname: varchar
- + DOB: date
- + Gender: char
- + Emergency Number: char
- + Blood: char
- + Weight: float
- + searchDoctor(): int[]
- + bookAppointment(int): bool
- + viewAppointment(int): int[]
- + viewPrescriptions(int): int[]
- + viewTest(int): int[]
- + searchTest(char): int[]
- + searchMedicine(char): int[]
- + addAllergy(char, int): bool
- + viewAllergy(int): char[]
- + addVaccine(char, int): bool
- + viewVaccine(int): char[]
- + provideReviews(int): bool
- + printPatientCard(int); void

### **Prescriptions**

- + ID: int
- + Date: date
- + D ID: int
- + P ID: int
- + Problem: varchar
- + Suggestions: varchar
- + updateProblem(int, char): bool
- + updateSuggestions(int, char): bool

## Consultation

- + D ID: int
- + H\_ID: int
- + Day: char
- + Start\_Time: timestamp
- + End Time: timestamp
- + Room: int
- + Fees: float
- + MAX Capacity: int
- + updateRoom(int, int, int): bool
- + updateFees(int, int, float): bool
- + updateCapacity(int, int, int): bool

### **Doctor Reviews**

- + P ID: int
- + D ID: int
- + Date: date
- + Comment: varchar
- + Ratings: float
- + Status: bool
- + updateDate(int, int, date): bool
- + updateComment(int, int, char): bool
- + updateRatings(int, int, float): bool
- + updateStatus(int, int, bool): bool

## **Doctor**

- + ID: int
- + License Number: int
- + Fname: varchar
- + Lname: varchar
- + Title: varchar
- + DOB: date
- + Gender: char
- + Experience From: date
- + Language: varchar
- + Current Position: varchar
- + P Location: varchar
- + searchPatient(int): int
- + newPrescription(int): bool
- + viewPrescription(int): int[]
- + viewAppointment(int): int[]
- + addAwards(char, int): bool
- + viewAwards(int): char[]
- + addSpeciality(int, char): bool + viewSpeciality(int): char[]
- + addDegree(int, char): bool
- + viewDegree(int): char[]
- + addJournals(char, int): bool
- + viewJournals(int): char[]
- + viewConsultationHour(int): char[]
- + viewReview(int): int[]

# Prescribed\_In

- + Pr\_ID: int
- + M ID: int
- + Morning: bool
- + M After Meal: bool
- + Noon: bool
- + N After Meal: bool
- + Night: bool + Nt After Meal: bool
- + updateMorning(int, bool): bool + updateNoon(int, bool): bool
